

Seamlessly integrates Acumatica ERP with Warehouse Management Software (WMS) used by third-party logistics/fulfillment companies that warehouse inventory, ship outbound sales orders and receipt inbound purchase orders.

ASC's **3PL Warehouse Management Software Integration Module (TPW)** comprehensively interfaces Acumatica ERP to warehouse management software packages. Many distribution companies use third party fulfillment companies, and this module allows Acumatica to interact with the 3PL as if it were an internal warehouse. On the sell-side TPW confirm ship method/carrier, updates tracking information, maintains inventory count and accounting. Sophisticated web services direct orders to the correct warehouse where multiple 3PL's and corresponding WMS's are involved. On the buy-side inventory is receipted and item quantities confirmed. TPW eliminates the need for generic integration middleware (e.g. Celigo & Jitterbit), is half the cost and easier to maintain because, 100% written within the Acumatica framework it provides all its workflow, monitoring, tracking, and dashboard advantages .

SUPPORTS MULTIPLE 3PL's

Auto-syncs order to the correct warehouse for fulfillment per various criteria including location, product, customer, etc.

KEY BENEFITS

OUTSOURCE WAREHOUSE OPERATIONS

- The Acumatica platform provides a cost-effective means for growth without additional personnel.
- Protocol Independency provides flexibility to choose the "right" 3PL partner.

PENETRATE NEW MARKETS

- Expand geographically without assuming local payroll burdens.
- Viable option for international operations.

RESPOND TO RAPID/SAME DAY DELIVERY DEMANDS

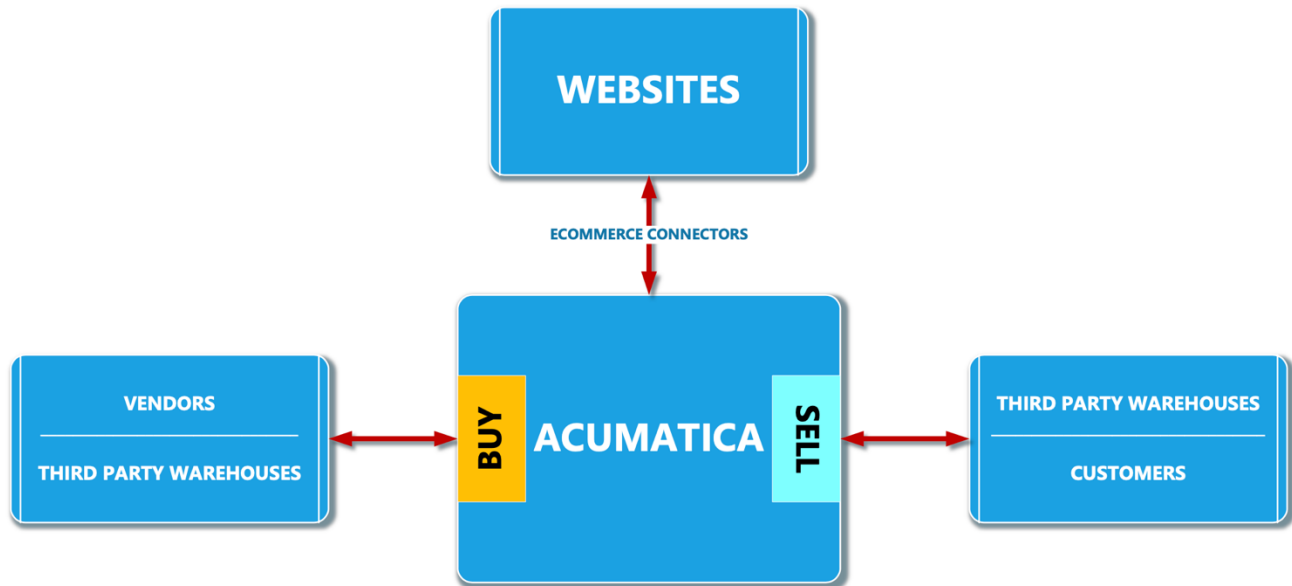

- Challenged by Amazon next day delivery. Fulfillment requests may be transmitted on demand to 3PL.

- Supports all the shipping options in Acumatica provided by the 3PL for improved customer service.

FOCUS ON CORPORATE STRENGTHS

- Outsource both Manufacturing and Warehousing. Focus on Design and Inventory Management, Replenishment.

INTEGRATE ACUMATICA WITH WAREHOUSE MANAGEMENT SOFTWARE(S) UTILIZED AT WAREHOUSE FULFILLMENT CENTERS

Protocol Independent – Supports RESTful, SOAP, WSDL, EDI, XMLRPC, or any new communication technologies.

Receiving – Supports inbound purchase orders (order to cash/order to ship/procure to receipt)

Extends eCommerce Edition for Hands Free “Book-to-Bill”

- *Workflow Enabled.* Customer Orders initiated in Web Site shopping carts flow “hands free” to 3PL for fulfillment, inventory, and GL update.
- *Notification Enabled.* Use Acumatica to email tracking numbers to customers and update the website similarly.

Supports Multiple Order Types and Maintains Accurate Inventory Counts

- *Returns.* Including RMA's, Returns for Replacement and Returns for Credit and (the difficult to manage) “Undeliverables.”
- *Inventory Control.* Treats 3PLs as another Acumatica warehouse with real-time updates associated with receipts, transfers, and shipments.

3PL WAREHOUSE MANAGEMENT SOFTWARE INTEGRATION MODULE FEATURES AND CAPABILITIES

Inventory Control	Treats 3PLs as another Acumatica warehouse with real-time updates associated with receipts, transfers, and shipments.
Workflows and Notifications	Customer Orders initiated in Web Site shopping carts flow “hands free” to 3PL for fulfillment, inventory, and GL update. Use Acumatica to email tracking numbers to customers and update the website similarly
Shipping	Fulfillment requests may be transmitted on demand to 3PL. Supports all the shipping options in Acumatica provided by the 3PL for improved customer service.
Protocol Independent	Supports RESTful, SOAP, WSDL, EDI, XMLRPC, or any new communication technologies.
Configuration Toolset	Auto-syncs orders to the correct warehouse for fulfillment per various criteria including location, product, customer, etc.
Receiving	In addition to handling outbound sales orders, you can now handle inbound purchase orders (order to cash/order to ship/procure to receipt).
Returns	Including RMA's, Returns for Replacement and Returns for Credit and (the difficult to manage) “Undeliverables.”
Adaptable Cloud	All applications are created for the cloud, which means that users with appropriate privileges can access the information from any device with a web browser or on native mobile apps.
Deployment Options	Acumatica can be installed in-house or in a private or public cloud of your choice. Your deployment and pricing options are designed to ensure mid-market success.
Ease of Use	Staff and customers can collaborate easily and efficiently on Mac, PC, tablet, or phone.

[ABOUT ADVANCED SOLUTIONS & CONSULTING CO.](#)

Advanced Solutions & Consulting Co. (ASC) is a founding Acumatica VAR with MVP status. We deliver [ISV solutions](#) that save serious time and money for supply chain and accounting applications. Our solutions are written in native Acumatica xRP. They address complex ERP requirements extending Acumatica's market breadth and competitiveness.

ASC augments Acumatica with elegant solutions that monitor and automate ERP functions to improve Acumatica's competitive landscape and save customers (and their VAR's) serious time and money.
