Monitor, Predict, and Manage Cash Across Multiple Entities

Manage all your cash needs from one place. Cash Management automatically collects all cash account transactions from the General Ledger, Accounts Payable, and Accounts Receivable. It provides real-time reports with summarized views that let you drill down to account details.

KEY FEATURES OF CASH MANAGEMENT

- **Integration with financial modules.** Automatically collect all cash account transactions from General Ledger, Accounts Payable, and Accounts Receivable into the integrated Cash Management module for clearing and reconciliation. Transactions that are linked to a vendor or customer automatically create entries in Accounts Payable or Accounts Receivable and update the appropriate balances.
- **Bank account reconciliation.** Simplify the reconciliation process by adding bank charges and bank interest and recording omitted cash directly from the reconciliation screen. Improve organizational internal control and audit compliance by establishing approvals of bank reconciliation statements to permit the appropriate individuals within the company to approve or reject bank reconciliation statements.
- **Cash account transfers.** Transfer funds between bank accounts and track funds that are in transit. Transfer between accounts in different currencies. Automatically calculate realized currency gains or losses.
- **Customizable reports.** Start with high-level reports and drill down to transaction details to simplify reconciliation, forecasting, and reporting.
- **Accommodate taxes.** Enable users to modify the cash transaction and accrue or strip out the tax from the cash transaction value.

“We made the necessary change and set up nearly all our customers onto direct debit payment processing, which is all managed through Acumatica. That's been a huge benefit for our cash flow and works very well for us.”

—Colin Gilhespy, Co-Owner and Managing Director, Cave Direct

> CUSTOMER STORIES

Petty Cash Management

Manage petty cash and bank account balances quickly and easily. View transaction history for a specific date range and switch between detailed and daily views. Trace both uncleared and cleared balances—and clear and add cash-related transactions—directly from the inquiry screen.

Remittance and Payment Instructions

Gather and pre-define payment information (such as preferred payment type and account numbers) for vendors and customers. Simplify and speed up payment processing.

Processing Centers

Configure the list of processing centers for cash collection and align customer payment methods with a particular processing center. The Accounts Receivable module uses this information for automated credit card processing.

Multiple Currencies Support

Maintain cash account balances in your base currency and your bank account currency. Execute cash revaluation to reflect rate changes. Automatically calculate realized gain and loss when transferring funds between accounts using different currencies.

Cash Account Security and Integrity

Control access to cash account information and balances. Prevent unauthorized access and restrict sensitive company information. Validate dates on financial forms and reject dates that do not match a period on the master calendar.

Cash Account Reporting

Use customizable reports to reconcile cash account balances and manage short-term cash reserves, forecasts, and projections. Drill down to review transaction details.

Audit Trails

Maintain a complete audit trail of all cash-related transactions. Handle corrections by adjusting entries, and each entry is logged. Capture the user ID for each transaction or adjustment. Attach notes and supporting documents directly to transactions.

Bank Reconciliation Approvals

Improve organizational internal control and audit compliance by establishing approvals of bank reconciliation statements to permit the appropriate individuals within the company to approve or reject bank reconciliation statements.

ABOUT ACUMATICA

Acumatica Cloud ERP is a comprehensive business management solution that was born in the cloud and built for more connected, collaborative ways of working. Designed explicitly to enable small and mid-market companies to thrive in today's digital economy, Acumatica's flexible solution, customer-friendly business practices, and industry-specific functionality help growing businesses adapt to fast-moving markets and take control of their future.
